

48th ANNUAL BREEDING STOCK SALE

APRIL 3, 2021

1:00 pm

“The biggest performance tested bull sale in Atlantic Canada.”

The Maritime Beef Testing Society is disappointed to announce that the 48th Annual Maritime Beef Testing Society Breeding Stock Sale scheduled for April 3, 2021 will not take place at the Test Station as with tradition. Given the current COVID-19 pandemic and the importance to protect the health of the public, the Board has decided to hold the sale online.

To ensure that the online sale goes as smoothly as possible, we have partnered with [LiveAuctions](#) to manage the selling of the bulls and heifers. By using the same platform as 2020, we are hoping to make the process as familiar and easy as possible.

51 Yearling Bulls on Offer

Born between December 1, 2019 & March 1, 2020

Performance Tested

Feed Efficiency Tested

Breeding Soundness Evaluation

24 Consigned Heifers

Bred and Open Heifers

Potential Foundation Cattle

DEFINITIONS, TERMS & CONDITIONS

These terms are applicable to all animals described within this Catalogue except where specifically noted for Yearling Bulls described within this Catalogue or Replacement Heifers described within this Catalogue.

ON TEST WEIGHT	The weight taken November 28, 2020, after the bulls completed the normal adjustment period and started on official test. (Recorded in pounds)												
OFF TEST WEIGHT	The weight on completion of test, that being the weight taken March 11, 2021. (Recorded in pounds)												
A.D.G. ON TEST	Total gain while on test divided by 112 days.												
RESIDUAL FEED INTAKE	Residual feed intake (RFI) is a measure of feed efficiency. It is the difference between the expected feed intake of the animal based on its body weight and growth rate, and what they actually consume. More efficient animals eat less than expected and have a negative or low RFI. Less efficient animals eat more than expected and have a positive or high RFI. Heritability of RFI is about 40%, and is independent of other production traits. Selecting for lower RFI will decrease feed intake with no detrimental effects on growth or size of the animal.												
YEARLING INDEX	The adjusted yearling weight expressed as a percentage of adjusted yearling weight for all bulls on test of that breed. EXAMPLE: An index of 115 indicates that the bull had a yearling weight of 15 % above the average of all bulls of that breed.												
AVERAGE FAT	The ultrasonic measurement of fat cover in millimeters and gives an indication of the relative fat cover on bulls in the sale. The average on the SALE BULLS is 5.14 mm so buyers can compare bulls to this average.												
SEMEN TESTING	Unless designated as "Deferred" all bulls in the sale have been semen tested and have passed.												
DEFERRED	Bulls that have been recommended for semen re-evaluation after the initial test.												
CALVING EASE SCORE	A rating assigned by the breeder to indicate the ease of calving. Rating indicated by the following letters: <table style="margin-left: 40px; border: none;"> <tr> <td style="padding-right: 20px;">U</td> <td>Unassisted</td> <td style="padding-right: 20px;">M</td> <td>Mal Presentation</td> </tr> <tr> <td>E</td> <td>Easy Pull</td> <td>S</td> <td>Surgical</td> </tr> <tr> <td>H</td> <td>Hard Pull</td> <td>V</td> <td>Voluntary Pull</td> </tr> </table>	U	Unassisted	M	Mal Presentation	E	Easy Pull	S	Surgical	H	Hard Pull	V	Voluntary Pull
U	Unassisted	M	Mal Presentation										
E	Easy Pull	S	Surgical										
H	Hard Pull	V	Voluntary Pull										
RIB EYE	The Rib Eye area gives an indication of overall carcass muscling. Rib Eye is measured using Real Time Ultrasound. The "scan" is taken at the grading site between the 12th and 13th ribs. In grading, Rib Eye area and fat cover are used to estimate lean meat yield. Low = 10 sq. in. and under Average = 10.1 sq. in. - 13.0 sq. in High = 13.1 sq. in. and up												
MARBLING - % OF INTRAMUSCULAR FAT	Marbling is an indication of intramuscular fat. Marbling is measured using Real Time Ultrasound. The "scan" is taken at the grading site between the 12th and 13th rib. The following table correlates the percentage of intramuscular fat to the Canadian Grading System. Single A (A) = 1.0 - 3.9 Double A (AA) = 4.0 - 4.9 Triple A (AAA) = 5.0 - 7.9 Canada Prime = 8.0 - 11.0												
ESTIMATED PROGENY DIFFERENCE (EPD)	An EPD (Expected Progeny Difference) is an estimated average number for a particular animal's trait. Those traits are things like: birth weight; calving ease; weaning weight; yearling weight and maternal milk. EPDs are not absolute figures; they are estimates based on averages. EPDs are based on the animal's own performance and pedigree records as well as those of its sire, grandsire, and siblings and of course, offspring. One thing to keep in mind is the EPDs can only be used to compare within breeds. Each breed has its own average values for EPDs.												
Birth Weight EPD	A bull's birth weight EPD shows the expected difference in average birth weight (pounds) for his progeny. Positive values signify heavier than average birth weights for that breed whereas negative values signify lighter birth weights.												
Calving Ease (CED) EPD	is expressed as percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers												

Weaning Weight EPD	A weaning weight EPD shows the ability of the calf to grow between birth and weaning, expressed in pounds of gain.
Yearling Weight EPD	A yearling weight EPD value shows the ability of a bull's offspring to grow from birth to one year of age, expressed in pounds of gain.
Maternal Milk EPD	Maternal milk EPD is one that signifies the ability of a sire's daughter to provide the calf with milk and mothering ability expressed as pounds of calf at weaning time.
Across Breed Comparison (ABC)	Across Breed Comparisons (ABCs) estimate an animal's trait specific genetic merit (expressed in the same units as EPDs)
Across Breed Percentile (%ab)	A percentile ranking of each ABC trait where 100 is the best possible ranking (i.e. %ab BW rank for bull 1105 in the attachment was 86 so that suggests he ranks in the top 14% for BW across the breeds)
ABC Accuracy (acc)	Presented with ABC to measure the strength of relationship between the genetic prediction (ABC) and true value. This is reported on a 0 to 100 scale, and as 'acc' approaches 100 the ABC is more reliable in estimating the true genetic merit of a given trait.
Within Breed Percentile (%wb)	A percentile ranking of ABC traits calculated within a breed for animals greater than 7/8 one breed - 100 is the best possible ranking (i.e. BW %wb for 1105 in your attachment is 87, meaning he ranks in the top 13% within his breed for BW).
TOTAL MIXED RATION	Indicates the bulls were fed on a silage based Total Mixed Ration.

CONDITIONS OF SALE

Yearling Bulls - Should any bull, after reaching the age of 14 months, fail to prove a breeder after being used for a reasonable period on cows known to be breeding, the matter shall be reported in writing to the consignor who shall then have the privilege of a reasonable period in which to prove the bull a breeder before refunding the purchase price or making other settlement satisfactory to the buyer. To qualify as a breeder, a bull must be able to perform natural service.

Yearling Bulls - Transportation of any animal(s) being returned to the consignor shall be paid by the shipper. The Sale Management acts as an agent only and under no circumstances will it accept financial responsibility between buyer and seller for any health, breeding or other problems that may arise following the Sale.

CONSIGNOR STATEMENTS

All statements have been prepared by the consignor. The MBTS does not confirm or adopt the statement.

ERRORS

Every attempt has been made to properly describe each lot. Neither the Management nor the compilers of pedigrees assume any responsibility for errors, which may occur in the Catalogue.

ANNOUNCEMENTS

Any announcements from the auction stand will take precedence over any printed information.

BIDS

Every animal is pledged to absolute sale (unless withdrawn for just cause prior to being offered for sale), but the Sale Management shall have the right to set a floor price applicable to all animals offered for sale and to reject any bid which it considers irresponsible. Every animal will be sold to the highest bidder.

DISPUTES

In case of disputes, bidding will be reopened between the parties involved. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in matters will be final.

PAYMENT

Cash, a satisfactory cheque, eTransfer, Interac or credit card (***There will be a processing surcharge administered to all card payments***). Payment shall be made to the clerk. Sale and release of the animals will be given only when satisfactory settlement has been made by the buyer.

CERTIFICATE OF REGISTRY

Yearling Bulls - All animals eligible for registration or recordation are recorded or will be recorded in the Herd Book of the Breed Association. Transferred registry certificates will be forwarded to the purchaser of each purebred animal. All transfers will be completed on the day of the sale to the buyer of record. Replacement Heifers - Only purebred animals specified are eligible for registration. Ownership transfers are the responsibility of the consignor.

RISK

All animals are at the purchaser's risk as soon as sold.

ACCIDENTS

The Sale Management, the auctioneer, nor the owners of the cattle will in any way be responsible for the condition of the grounds or the behavior of the cattle being sold and disclaim any liability in the event of personal accident or property loss.

COMMISSION FEE

Bulls - A 8.5% selling commission and a transfer cost will be charged to the seller and deducted from their payment.
Heifers - A \$125 flat fee will be charged to the seller and deducted from their payment. Any animal which does not sell for a predetermined floor price will be charged cost of cataloguing the animal.

SALE MANAGED BY: MARITIME BEEF TESTING SOCIETY

THESE TERMS AND CONDITIONS SHALL BE A CONTRACT BETWEEN THE BUYER AND SELLER OF EACH LOT.
