

MARITIME BEEF TESTING SOCIETY

53rd Annual Breeding Stock Sale

April 4, 2026 - 1:00 PM
Nappan, NS

2026 Canadian Simmental Association AGM Convention

in the Maritimes

Annapolis Valley, Nova Scotia
July 23 - 26, 2026

***New PEI Pre-Tour Event**
July 20 - 22, 2026

- Rodd Brudenell Resort
Brudenell, PE
- Deep sea fishing, farm tours & true PEI hospitality!

2026 Candian Simmental Association AGM Convention

- Old Orchard Inn *Wolfville, NS*
- Join us for networking opportunities, farm tours, panel discussion, CSA AGM & more!

Registration information and full event schedules can be found at:
MaritimeSimmentalAssociation.com

2026 Young Candian Simmental Association National Classic

- Hants County Exhibition Grounds *Windsor, NS*
- Featuring conformation classes for purebred and Simmental influenced cattle, judging & showmanship competitions & more for YCSA members.
- Visit <https://www.simmental.com/yscaaboutus.html> to become a YCSA member today!

DEFINITIONS, TERMS & CONDITIONS

These terms are applicable to all animals described within this Catalogue except where specifically noted for Yearling Bulls described within this Catalogue or Replacement Heifers described within this Catalogue.

ON TEST WEIGHT	The weight taken on November 12, 2025, after the bulls completed the normal adjustment period and started on official test (recorded in <u>pounds</u>).						
OFF TEST WEIGHT	The weight on completion of test, that being the weight taken March 4, 2026 (recorded in <u>pounds</u>).						
BIRTH WEIGHT (BW)	Birth weight (recorded in <u>pounds</u>)						
AVERAGE DAILY GAIN (ADG)	Total gain while on test divided by 112 days.						
AVERAGE DAILY GAIN INDEX (ADG IN)	Is the ADG expressed as a <u>percentage</u> for all bulls on test of that breed. EXAMPLE: An ADG index of 115 indicates that the bull had an ADG 15% above the average of all bulls of that breed.						
WDA	Average Weight Per Day of Age Gain						
WDA IN	Is the WDA expressed as a percentage for all bulls on test of that breed. EXAMPLE: An WDA index of 115 indicates that the bull had a WDA 15% above the average of all bulls of that breed.						
ADJUSTED YEARLING WEIGHT (ADJ YW)	A MBTS calculated Yearling weight based off of the March 4, 2026, weigh in.						
RESIDUAL FEED INTAKE (RFI)	Residual feed intake (RFI) is a measure of feed efficiency. It is the difference between the expected feed intake of the animal based on its body weight and growth rate, and what they actually consume. More efficient animals eat less than expected and have a negative or low RFI. Less efficient animals eat more than expected and have a positive or high RFI. Heritability of RFI is about 40% and is independent of other production traits. Selecting for lower RFI will decrease feed intake with no detrimental effects on growth or size of the animal.						
AVERAGE BACK FAT (BF)	The ultrasonic measurement of fat cover in <u>millimeters</u> and gives an indication of the relative back fat cover on bulls in the Sale. The average on the SALE BULLS is 3.71 mm so buyers can compare bulls to this average.						
RUMP	Rump fat measured in <u>millimetres</u> (Measurements taken in mid-February)						
SCOT	Scrotal Circumference in <u>centimetres</u> (Measurements taken mid-February)						
SEMEN TESTING	All bulls in the sale have been semen tested, with final results indicated on the sale-day supplement sheet						
DEFERRED	Bulls that have been recommended for semen re-evaluation after the initial test.						
CALVING EASE SCORE	A rating assigned by the breeder to indicate the ease of calving. Rating indicated by the following letters: <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">U Unassisted</td> <td style="width: 50%;">M Mal Presentation</td> </tr> <tr> <td>E Easy Pull</td> <td>S Surgical</td> </tr> <tr> <td>H Hard Pull</td> <td>V Voluntary Pull</td> </tr> </table>	U Unassisted	M Mal Presentation	E Easy Pull	S Surgical	H Hard Pull	V Voluntary Pull
U Unassisted	M Mal Presentation						
E Easy Pull	S Surgical						
H Hard Pull	V Voluntary Pull						
RIB EYE (ADJ REA)	The Rib Eye area gives an indication of overall carcass muscling. Rib Eye is measured using Real Time Ultrasound. The "scan" is taken at the grading site between the 12 th and 13 th ribs. In grading, Rib Eye area and fat cover are used to estimate lean meat yield, measured in <u>square inches</u> . low = 12.4 sq. in. and under Average = 12.5 sq in - 14.3 sq in. High = 14.4 sq in and up						
MARBLING - % OF INTRAMUSCULAR FAT(ADJ IMF)	Marbling is an indication of intramuscular fat. Marbling is measured using Real Time Ultrasound. The "scan" is taken at the grading site between the 12 th and 13 th rib. The following table correlates the <u>percentage</u> of intramuscular fat to the Canadian Grading System. Single A (A) = 1.0 - 3.9 Double A (AA) = 4.0 - 4.9 Triple A (AAA) = 5.0 - 7.9 Canada Prime = 8.0 - 11.0						

ESTIMATED PROGENY DIFFERENCE (EPD)	An EPD (Expected Progeny Difference) is an estimated average number for a particular animal's trait. Those traits are things like birth weight; calving ease; weaning weight; yearling weight and maternal milk. EPDs are not absolute figures; they are estimates based on averages. EPDs are based on the animal's own performance and pedigree records as well as those of its sire, grandsire, siblings and of course, offspring. Something to keep in mind is that EPDs can only be used to compare within breeds. Each breed has its own average values for EPDs. EPD's are current as of approximately March 10, 2026.
BIRTH WEIGHT (BW) EPD	A bull's birth weight EPD shows the expected difference in average birth weight (<u>pounds</u>) for his progeny. Positive values signify heavier than average birth weights for that breed, whereas negative values signify lighter birth weights.
CALVING EASE (CE) EPD	Calving ease is expressed as a <u>percentage</u> of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in the ease with which a sire's calves will be born when he is bred to first-calf heifers
WEANING WEIGHT (WW) EPD	A weaning weight EPD shows the ability of the calf to grow between birth and weaning, expressed in <u>pounds</u> of gain.
YEARLING WEIGHT (YW) EPD	A yearling weight EPD value shows the ability of a bull's offspring to grow from birth to one year of age, expressed in <u>pounds</u> of gain.
MATERNAL MILK (MILK) EPD	Maternal milk EPD is one that signifies the ability of a sire's daughter to provide the calf with milk and mothering ability expressed as <u>pounds</u> of calf at weaning time.
TOTAL MIXED RATION	Indicates the bulls were fed on a silage-based Total Mixed Ration.
SALE SELECTION	Based on the combination of the Global Performance Index and consignor confirmation of sale interest. The Sale Committee chooses the leading bull for each breed.
GLOBAL INDEX	Global index is an index that measures the ranking of multiple different traits within a contemporary group. It gives producers a broad picture of how a bull ranks across multiple traits. Included in our Global Index is: ADG (35%) WDA (20%) Carcass traits - REA & IMF (15%), RFI (15%) & Conformation (15%). Sale Eligible and Sale Order were both based off the bulls' Global index scores. This allows us to ensure the bulls in the sale are well balanced, that are strong in multiple traits.

CONDITIONS OF SALE

Yearling Bulls - Should any bull, after reaching the age of 14 months, fail to prove a breeder after being used for a reasonable period on cows known to be breeding, the matter shall be reported in writing to the consignor who shall then have the privilege of a reasonable period in which to prove the bull a breeder before refunding the purchase price or making other settlement satisfactory to the buyer. To qualify as a breeder, a bull must be able to perform natural service.

Yearling Bulls - Transportation of any animal(s) being returned to the consignor shall be paid by the shipper. The Sale Management acts as an agent only and under no circumstances will it accept financial responsibility between buyer and seller for any health, breeding or other problems that may arise following the Sale.

CONSIGNOR STATEMENTS

All statements have been prepared by the consignor. The MBTS does not confirm or adopt the statement.

ERRORS

Every attempt has been made to properly describe each lot. Neither the Management nor the compilers of pedigrees assume any responsibility for errors, which may occur in the Catalogue.

ANNOUNCEMENTS

Any announcements from the auction stand will take precedence over any printed information.

BIDS

Every animal is pledged to absolute Sale (unless withdrawn for just cause prior to being offered for Sale). The Sale Management shall have the right to set a floor price applicable to all animals. The floor price for bulls is \$2,500 and there is no floor price for heifers. The auctioneer or Sale Management may reject any bid which it considers irresponsible. Every animal meeting the floor price will be sold to the highest bidder.

DISPUTES

In case of disputes, bidding will be reopened between the parties involved. If no further bidding is made, the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in matters will be final.

PAYMENT

Cash, a satisfactory cheque, eTransfer, Interac or credit card (***There will be a processing surcharge administered to all card payments***). Payment shall be made to the clerk. Sale and release of the animals will be given only when satisfactory settlement has been made by the buyer.

CERTIFICATE OF REGISTRY

Yearling Bulls - All animals eligible for registration or recordation are recorded or will be recorded in the Herd Book of the Breed Association. Transferred registry certificates will be forwarded to the purchaser of each purebred animal. All transfers will be completed on the day of the Sale to the buyer of record. Replacement Heifers - Only purebred animals specified are eligible for registration.

RISK

All animals are at the purchaser's risk as soon as sold.

ACCIDENTS

The Sale Management, the auctioneer, nor the owners of the cattle will in any way be responsible for the condition of the grounds or the behaviour of the cattle being sold and disclaim any liability in the event of personal accident or property loss.

COMMISSION FEE

The MBTS administers a spring breeding stock sale after the completion of the testing program. The Sale is an opportunity for consignors to market animals collectively. To cover the costs of administering the Sale, the MBTS shall charge all animals that sell a commission of 10% of the sale price for bulls and heifers. Any animal which does not sell for a predetermined floor price will be charged the cost of cataloguing the animal.

SALE MANAGED BY: MARITIME BEEF TESTING SOCIETY

THESE TERMS AND CONDITIONS SHALL BE A CONTRACT BETWEEN THE BUYER AND SELLER OF EACH LOT.

Canadian Angus Green Tags

The Tag with Benefits

Angus-branded beef programs across Canada need and want to verify that what they are selling as Angus beef is indeed Angus. One way to prove that is by procuring cattle that are tagged with Canadian Angus Tags.

Tagging your animals with Canadian Angus tags has its benefits:

- Sell direct or through Canadian Angus Feeder Sales across Canada.
- Canadian Angus green RFID tags visually and electronically identify Angus and Angus cross cattle. It's our guarantee that the animal bearing the tag has a minimum of 50% Angus genetics.
- CCIA compliant tag—no other RFID tag is required for national identification.
- Automatic enrollment in Verified Angus and access to genetics-based branded Angus beef programs and marketing opportunities for Canadian Angus genetics.
- Access to the AngusCONNECT marketplace.

Weren't able to tag your calves green? The Canadian Angus Association can verify calves for you through the Angus Verified program. Contact CAA for more details.

Ordering your Canadian Angus Tags (RFID) has never been so easy:

Please order directly from CCIA online at www.canadaid.ca or call 1-877-909-2333. CCIA carries both the Datamars brand Temple Tag ComfortEar Canadian Angus RFID indicator as well as the Allflex brand Canadian Angus RFID indicator.

Order your Canadian Angus management tags directly through the Canadian Angus Association. Order online www.cdnangus.ca/adding-value/ordering-caa-management-tags or call 1-888-571-3580.

Performance in All Crops

The defining feature of BV5160 series balers is the ability to produce bales of unrivalled quality in a wide variety of crop conditions, from wet silage right through to dry straw. Efficiency and performance are unmatched, while smart 'Intelligent density' allows bales to be tailored to perfectly match all requirements.
